## SIXTEEN CANDLES 2017-2018 FLYDATE PRODUCTION RIDER

### STAGE, AUDIO, LIGHTING & BACKLINE:

Purchaser agrees to provide all Stage, Audio, Lighting & Backline requirements per artist rider. Please provide us the contact info for all vendors supplying such items.

**Please forward all production advance information to:**

**Chad Cook**

**+1 309-241-2994**

[chad@cbackline.com](mailto:chad@cbackline.com)

### STAGE:

Stage requirements are case by case basis and contingent to the venue. Typically a 32'x 20' w/ carpeted 8'x8' drum riser is recommended. Additional PA wings if audio is to be ground stacked. Please provide stage stairs or ramp. Stage roof required for all outdoor performances.

### AUDIO FOH:

We typically travel with FOH engineer. In the event that we are not traveling with a FOH engineer we will require (1) sober, qualified engineer that is familiar with the system. This info will be known at time of advance.

### FOH CONSOLE:

We travel with a dLive CDM32 stage rack that will cover FOH & monitor desk requirements. Please provide a Cat5 or Cat6 run from drum riser to FOH position. If you have the ability to provide a dLIVE C3500 surface this will be met with much appreciation. Please provide space at FOH position for *Laptop, IP8 controller and IPAD*

### FOH AUDIO SYSTEM:

Purchaser to provide an above adequate audio system to fit the venue and capacity in which we are perform in. The system needs to be properly tuned, time aligned and evenly distributed throughout the entire listening area. The system needs to be capable of maintaining an average sound pressure level of 112dbA with a frequency response of 40Hz-16kHz. We prefer to have Subs on Aux configuration with a separated front fill, adjustable from FOH.

Line Array systems are always preferred and Front fill coverage is a MUST.

### MONITOR SYSTEM:

For fly dates we will require (4) sets of Sennheiser or Shure IEM units each on stereo mixes plus (1) mono wedge mix (powered monitors are acceptable). These mixes will be connected to our stage rack in stereo. Please provide either an 8channel fan to fan or enough xlr cables to patch these units.

### MISC AUDIO:

(1) 12chan sub snake (drums)

(6) Tall booms

(6) Short booms

XLR package (50', 25', 15')

(1) 8chan fan to fan (IEM rack)

(4) Passive DI boxes (Radial preferred)

(1) 8chan sub snake (downstage L)

(1) Straight Rnd base

(4) LP Claws

**Microphone package (see input list for specs)**

**(1) CAT5 or CAT6 (FOH to drum riser)**

## SIXTEEN CANDLES 2018-2019 FLYDATE PRODUCTION RIDER

### LIGHTING:

For most fly dates we will not be traveling with an LD. We will require (1) qualified and sober LD to be provided. Discussion of fixtures and lighting type can be done during advance. Sixteen Candles are a highly energetic band and will require the lighting rig to help reflect that energy. Moving fixtures, haze and strobes are encouraged and welcomed. Spotlights are encouraged but not necessary. Need to have full control of down stage frontal light dimming and the ability to black out.

### BACKLINE:

**Purchaser** to provide the following equipment:

#### Drums
