## SIXTEEN CANDLES 2020 PRODUCTION RIDER

### STAGE, AUDIO, LIGHTING & BACKLINE:

Purchaser agrees to provide all Stage, Audio, Lighting & Backline requirements per artist rider if applicable. Please provide us the contact info for all vendors supplying such items. *For standard bus dates we will travel with FOH, Monitors, LD and all backline..... We travel with all microphones, cables, sub snake drops, stands, & monitors.*

**Please forward all production information to:**

**Chad Cook**

**+1 309-241-2994**

[chad@cbackline.com](mailto:chad@cbackline.com)

### STAGE:

Stage requirements are case by case basis and contingent to the venue. Typically a 32'x 20' w/ carpeted 8'x8' drum riser is recommended. Additional PA wings if audio is to be ground stacked. Please provide stage stairs or ramp. Stage roof required for all outdoor performances.

### AUDIO FOH:

We typically travel with FOH engineer. In the event that we are not traveling with a FOH engineer we will require (1) sober, qualified engineer that is familiar with the system. This info will be known at time of advance.

### FOH CONSOLE:

We travel with a dLive C3500 surface and CDM32 mix rack which will cover FOH & monitors via digital split. We carry 200' CAT5 & an additional 125' CAT5. Please dedicate a FOH position and an electrical run to this position. We will send you (4) analog lines for Left, Right, Aux Sub & Fill. *For fly dates we will not carry the surface.*

### FOH AUDIO SYSTEM:

Purchaser to provide an above adequate audio system to fit the venue and capacity in which we are perform in. The system needs to be properly tuned, time aligned and evenly distributed throughout the entire listening area. The system needs to be capable of maintaining an average sound pressure level of 112dbA with a frequency response of 40Hz-16kHz. We prefer to have Subs on Aux configuration with a separated front fill, adjustable from FOH.

Line Array systems are always preferred. **Front Fill coverage is a must!**

### MONITOR SYSTEM:

For bus dates we are completely self-contained for monitors.

For fly dates we will require (4) sets of Sennheiser or Shure IEM units each on stereo mixes plus (1) mono wedge mix (powered monitors are acceptable). These mixes will be connected to our stage rack in stereo. Please provide either an 8channel fan to fan or enough xlr cables to patch these units.

### MISC AUDIO: (Fly dates only)..(bus dates are self contained)

(1) 12chan sub snake (drums)	(1) 8chan sub snake (downstage L)
(6) Tall booms	(1) Straight Rnd base

## SIXTEEN CANDLES 2020 PRODUCTION RIDER

### LIGHTING:

**For bus dates...**We travel with LD (please contact Mike "Z" Gotshall at 847-800-6286). We travel with (2) pieces of upright truss, Lighting desk and a moving fixture package. ***Please provide info regarding house lighting...Fixture Make, model, position & DMX start addresses.***

For most **fly dates** we will not be traveling with an LD. We will require (1) qualified and sober LD to be provided. Discussion of fixtures and lighting type can be done during advance. Sixteen Candles are a highly energetic band and will require the lighting rig to help reflect that energy. Moving fixtures, haze and strobes are encouraged and welcomed. Spotlights are encouraged but not necessary. Need to have full control of down stage frontal light dimming and the ability to black out.

### BACKLINE: (fly date only)
